

***Horticultural Sciences Department***  
***Spring Seminar Series, 2009***  
***Mondays: 4:00 pm, Room 2316 Fifield Hall***

<b>Date</b>	<b>Name</b>	<b>Seminar Title</b>
Mar. 2	Gurreet Brar	Effects of Temperature, Water Stress, and Photoperiod on Liner and Budded Tree Growth in Containerized Citrus Nurseries
	Divya Kainth	The Production of Red Fleshed Grapefruit/Pummelo Tetraploid Hybrid Parents to Aid Grapefruit Improvement Program
Mar. 9	<b>Spring Break - No seminar</b>	
Mar. 16	Eduardo Chica	Molecular Basis of Flower Bud Induction and Flowering Intensity in Sweet Orange ( <i>Citrus sinensis</i> )
	Kristen Young	Inheritance and Molecular Marker Analysis of Resistance to Squash Silverleaf Disorder in Summer Squash ( <i>Cucurbita pepo</i> )
Mar. 23	Preeti Sood	Effects of Laser Labeling on the Quality of Florida Fruits and Vegetables
	Alyssa Cho	Sunn Hemp ( <i>Crotalaria juncea</i> ) for Seed: a New Cash Crop for Organic Growers in the Southeastern United States
Mar. 30	Maricruz Ramirez-Sanchez	Influence of Irrigation Programs on Strawberry Cultivar Growth and Yield
	M. Fadhli Mad Atari	Development of Diploid Strawberry Genotype 5AF7 as a Functional Genomics Resource
Apr. 6	Zhang Tingting	Plant Physiological and Developmental Changes Induced by Green Light
	Sambhav	Integrated Approach to Reduce Peel Breakdown in Citrus
Apr. 13	Poh Bee Ling	Reducing Nutrient Loss below the Zone of Drip-irrigated Vegetables Using Low Pressure Irrigation
	Kyle Kneale	The Pursuit of the True Datil Pepper with Optimal Quality Characteristics
Apr. 20	Mehul Bhakta	Genetics of Southern Blight Resistance in Tomato
	José Celedón	Quantitative Spatial and Temporal Analysis of Tat Translocation
